FULL STACK DEVELOPER

As a full-stack developer with expertise in ASP.NET Core and React, I craft dynamic, high-performance web applications. My skill set spans front-end technologies like HTML, CSS, JavaScript, jQuery, and Bootstrap, as well as back-end development with PHP, Laravel, and C#. I excel in building RESTful APIs, implementing object-oriented programming, and managing SQL/MySQL databases. With a strong command of Git/GitHub, I deliver robust, scalable solutions that drive business success.

LANGUAGES

- HTML, CSS
- JS, jQuery
- Bootstrap, tailwind
- React
- C#, Asp.Net
- PHP, Laravel

ADDITIONAL SKILLS

- Creates dynamic Single Page Applications by using React.
- Manages SQL and MySQL databases.
- Develops secure Web APIs and REST services by using Asp.Net.
- Uses Git and GitHub for version control.
- Applies Object-Oriented Programming principles.
- Implements AJAX for data handling.
- Integrates third-party libraries and APIs.

WORK EXPERIENCE

Frontend Development

With 2 years of experience in frontend development, I've crafted engaging website layouts using HTML, CSS, JavaScript, and Bootstrap. I've designed e-commerce sites and gaming store interfaces, focusing on responsive and user-friendly designs. My work involves integrating libraries to enhance functionality and performance, ensuring a seamless and visually appealing user experience across various devices.

Backend Development

Over 2 years in backend development, I've utilized .NET and PHP Laravel to build scalable and efficient server-side applications. Experienced in managing MySQL and SQL databases, I've developed and integrated APIs to facilitate smooth client-server interactions. My expertise includes using libraries to extend functionality and optimize performance, delivering robust solutions tailored to business needs.
